

HAOYANG LI

London, UK | hello@haoyang-li.com | haoyang-li.com | Open to relocation worldwide

AI systems architect and full-stack engineer delivering enterprise AI products from discovery to production, combining LLM applications, SaaS architecture, integration and automation with customer-facing technical delivery.

Experience

Zenith AI / My Club Group ↗

May 2025 – Present

Lead AI & Data Integration Architect

London, UK

- Own enterprise AI delivery from customer discovery and architecture design through full-stack development, deployment and iteration with business stakeholders.
- Independently designed and built GAIMS, a patent-pending, auditable AI decision layer for supplier allocation, processing 3,000+ purchase orders in production since February 2026. Combines frontier LLMs, historical and risk data, brand-specific criteria and human-review feedback; implements tenant isolation and sensitive-data redaction.
- Built tailored GAIMS demos for enterprise prospects, from UK sportswear brands and global sports retailers; presented architecture and business value to executives and IT teams during NDA-stage evaluations.
- Deployed Voiceflow chat agents with 40K+ messages and 15K+ users; built Retell voice agents integrating Zoho CRM lead capture, call summaries, transcripts and intent-based sales routing.
- Built 50+ n8n workflows integrating AI products with CRM and operational data, supporting order-status retrieval, sales-call booking and cross-system business processes.
- Delivered Kit Funder, a client portal and Zenith AI's website; built full-stack customer workflows spanning authentication, payments, order tracking and CRM integration.

Outlier AI ↗

Oct 2024 – May 2025

AI Training Engineer

Remote

- Designed rubrics and adversarial prompts for frontier LLM post-training (RLHF); evaluated reasoning, code generation, instruction following and tool calling, surfacing systematic failure modes for model training teams.
- Led a 15-person evaluation team; set quality benchmarks and calibrated reviewers against ground truth.

Guolian Minsheng Securities Co., Ltd

Jun 2023 – Aug 2023

Quantitative Researcher

Zhengzhou, China

- Researched commodity futures trading strategies using Python, SQL and PCA-based factor analysis.

Entrepreneurial Experience

Kelay AI

May 2026 – Present

Technical Co-founder

London, UK

- Built a pilot-ready voice AI booking application for small businesses using Next.js, TypeScript and PostgreSQL; integrated Retell agent provisioning and English/Mandarin conversations within a multi-tenant architecture.
- Implemented booking, rescheduling and cancellation tools, webhook signature verification and idempotent call storage; resolved caller-ID and model-latency issues through test calls.

Education

London School of Economics and Political Science

Sep 2023 – Sep 2024

MSc Applicable Mathematics

Coursework: Algorithmic Techniques in Machine Learning; Algorithms and Data Structures; Optimisation Methods

King's College London

Sep 2020 – Jun 2023

BSc Mathematics & Statistics

Coursework: Computational Methods with Python; Statistical Modelling; Linear Algebra; Stochastic Calculus in Finance

Skills

Engineering: TypeScript, JavaScript, Python, SQL, React, Next.js, Node.js

AI & integration: LLM APIs, RAG, prompt engineering, tool calling, REST APIs, n8n, Zoho CRM, Retell, Voiceflow

Data & deployment: PostgreSQL/Neon, Supabase, Airtable, Railway, Vercel, Netlify, Cloudflare

Developer tools: Git/GitHub, Claude Code, Codex, Cursor, Base44

Languages: Mandarin (native), English (fluent), Spanish (proficient)
